Rows per page: 151-1 of 1<>

6 Click the "Name (optional)" field.

7 Type "Giorgos"

8 Click the "Email address" field.

9 Type "giorgos2@gmail.com"

10 Click "Role"

The screenshot shows a web application interface for managing team members. On the left is a sidebar with navigation links: "Authentication settings", "SSO settings", "Team members" (highlighted), "Management API", and "Billing". At the top left of the main area is a "Back to dashboard" button. The main heading is "Members". To the right of the heading is a search bar labeled "Search by email" and an "Invite" button. Below the heading is a table with an "Actions" column. An "Invite Member" modal is open in the center, containing the following fields:

- Name (optional):
- Email address:
- Role:

Below the fields, a note states: "All members are automatically assigned the No Access Role. Select additional Roles to assign more permissions." At the bottom of the modal are "Cancel" and "Invite" buttons.

11

Click "Able to perform all actions across the dashboard, including managing Live API Keys."

The screenshot shows a web interface for managing members. On the left is a sidebar with navigation links: "Back to dashboard", "Authentication settings", "SSO settings", "Team members" (highlighted), "Management API", and "Billing". The main area is titled "Members" and includes a search bar "Search by email" and an "+ Invite" button. An "Invite Member" modal is open, containing the following fields:

- Name (optional):** A text input field containing "Giorgos".
- Email address:** A text input field containing "giorgos2@gmail.com".
- Role:** A dropdown menu with the text "Select Role" and an upward arrow. The dropdown is open, showing four options:
 - Admin:** Able to perform all actions across the dashboard, including managing Live API Keys. (This option is highlighted with an orange circle in the original image.)
 - Developer:** Able to manage project configurations, and has write access to all core entities. Can view and create API Keys in Test, but not in Live.
 - Support Agent:** Read access to project Users, Members, Organizations and event logs. Able to take non-destructive write actions on Users/Members, such as resetting passwords and revoking sessions. Default role for JIT Provisioned users if no other automatic role assignments apply.
 - Support Manager:** Read access to project configurations and event logs.

12 Click "Invite"
